Forecast for Sunday 06 Sep 2020

Weather: Cloud shrouding tops at first, leading to a dull start. Mostly dry at first, but showers moving in during the morning, perhaps heavy at times. These continuing into the afternoon, but fading through the evening with some late brighter spells, and then some clear spells after dark.

Chance of cloud free mountain/hill tops above 600m: 30% at first, with widespread cloud at 500m. Improving to 70% during the afternoon, with cloud mainly shrouding tops above 500m during heavier showers. Improving to near 100% after dusk.

Visibility: Moderate at times in any heavier showers, otherwise moderately distant hills visible during the morning, This improving by the afternoon, with some good views likely of distant hills between any showers, but falling again during them.

Valley	11/10	11/11	12/12	14/14	14/13	12/11	10/10
Freezing Level*	2200m	2200m	2200m	2200m	2000m	1900m	1900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite quite a few showers, along with some cloud obscuring higher tops, conditions should be fairly typical for early autumn. With a weatherproof and appropriate equipment, there should be some reasonable conditions at times.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

02:00 on Sun 06 Sep 2020	1.8mm	1.8mm	10.8mm

Forecast for Monday 07 Sep 2020

Weather: A cold start, with some patchy mist and fog in the valleys. Some early sunshine is likely, before clouds quickly thicken from the west. These descending onto western slopes by the afternoon, with outbreaks of rain and drizzle. Some eastern hills staying drier, and clearer. Winds also strengthening a little by the afternoon

Maximum wind: Southwesterly 15-20mph increasing to Westerly 20-25mph with gusts 30-35mph by the afternoon.

Chance of cloud free mountain/hill tops above 600m: 90% at first, but falling to 60% around mid-morning, and then 20% in the east by midday. Cloud descending onto hills above 500m, with the odd patch down to 400m in the west. Some clear tops remaining possible in the east.

Visibility: Some poor visibility at lower levels around dawn due to patchy mist and fog lifting from the valleys. On the hills, some distant hills likely visible at first, but these views gradually deteriorating through the day

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 16 Celsius
At 600m: Plus 8 Celsius becoming Plus 12 Celsius
Freezing level: Above the summits.
